2 December 2009

Mr. Glynn Lookabill
President, PreMed Training Group

Over the past two years, we have contracted with PreMed to provide training courses to our members and the local EMS community. The courses that have been offered have provided training that would have otherwise not been available locally. Although our organization provides much of its training in-house, it has proven valuable to have PreMed provide classes.

PreMed brings talented instructors from outside our area with a wealth of personal experience. The perspective of the instructors helps to increase the knowledge of our providers beyond simply providing a certification class. Feedback from these courses has been very positive. The instructors make the classes very fun and interactive, which goes a very long way in facilitating learning.

We are proud to have an ongoing relationship with PreMed and will continue to schedule classes in the future that enhance the knowledge and abilities of our providers.

Sincerely,

A handwritten signature in blue ink, appearing to read "T. McGregor".
