Saturday, February 13, 2010

Mr. Glynn Lookabill
President, PreMed Training Group

Since 2007 members of Montross Volunteer Rescue Squad have attending trainings conducted by PreMed, and since 2008 this agency has contracted with PreMed for onsite ALS training that would have otherwise not been available locally. This training has been invaluable. The reputation of PreMed attracts emergency medical providers from all over Virginia. This year's Pedi-Trio class, which covers PALS, PEPP and P-ITLS has attracted students from Maryland and North Carolina as well.

Students enrolled in PreMed courses received well in advance of the course detailed instructions which allowed them to obtain texts, study, and take pretests prior to attending the first day of class.

The perspective of the instructors, their varied knowledge base, and advanced levels of training and certification enhance the instruction provided, as they challenge the students while making the learning process dynamic and fun. The instruction is fast paced with significant time spent in hands-on, interactive practical stations.

Students have always evaluated the program and its instructors very highly. Montross Volunteer Rescue Squad plans to continue its educational relationship with PreMed and will continue to schedule classes in the future that enhance the knowledge and abilities of our providers.

Most sincerely,

Suzanne K. Tolson, MEd,CC-EMT-P

1st Lt. Training Officer
Rappahannock Community College EMS Program Director
